

Advocacy Campaign for Making Schools Safer

Joint efforts for making our schools safer

Awareness is the first and crucial step towards action for making schools safer. Safer Schools Campaign's advocacy efforts aims to build knowledge of school stakeholders and DRR practitioners.

southasiadisasters.net is reaching out to individuals and organisations in the region who are working and interested in the field of disaster risk reduction. Eight editions of the English newsletter *southasiadisasters.net* were published on school safety experience. The publications were translated into *Afat Nivaran* – a local language newsletter in Gujarati for local readers and *Vipada Nivaran* – a newsletter in Hindi for national readers.

AIDMI has developed a kit of various publications on school preparedness and safety. This kit was updated during the year with various new publications on school safety. Disseminating this kit to more and more schools and school authorities is essential. The kit material is also being created in several local languages (Gujarati, Hindi, Tamil, Urdu and Burmese).
